Toy Standard EN71
Crystal URK UV curing inks from SunJet

The European Toy Standard EN71 Part 3 limits the concentration of specified heavy metals in the coatings used on toys, including antimony, arsenic, barium, cadmium, chromium, lead, mercury and selenium. Crystal URK curing inks from SunJet meet the requirements of EN71 Part 3.

In relation to other parts of EN71 it is the responsibility of the toy manufacturer to ensure that the finished article does not present a danger to health.
